High-Leverage Pliers

Available in side or diagonal-cutting models, these pliers feature a high-leverage design. The rivet is closer to the cutting edge for greater cutting and gripping power than other plier designs. The 2000 Series have heavy-duty cutting knives for ACSR, screws, nails and most hardened wire. The angled head on the diagonal cutters easily gets into tight spaces. The “TT” series feature a split ring for tethering the pliers when working at height.

Why is it important?

Data released by OSHA in 2016 ranks being "struck by objects" as the second leading cause of workplace fatalities in private industry construction. Being struck by an object is part of the "Fatal Four" that were responsible for more than half of construction workers deaths in 2016.

Klein Tools' growing line of tethers and tools for Work@Height are designed to protect workers on the job site as well as their tools. Klein Tools catalog numbers with TT designate tools with tether holes.
