Incorporating multiple styles is a great way to segment your outdoor living areas into rooms without roofs. Adding a sleek border with a more natural stone, like in the image at right, creates the cozy feeling of a hearth rug in front of the fireplace.

FREESTANDING OR RETAINING

Knowing the difference between retaining and freestanding walls can have a positive impact on your project and lead to a more enjoyable outdoor space.

Freestanding walls allow you to divide your outdoor living space into different areas. They provide visual interest and can make even the largest yard feel more intimate. Freestanding walls easily incorporate with other features like fireplaces or outdoor kitchens to provide a seamless appearance.

Retaining walls can have multiple purposes. Some help to increase usable space, whether that be a flower bed or added yard space, while other retaining walls help to prevent erosion. Either application is made possible by the wall system holding back soil and properly managing drainage. Larger walls also utilize soil reinforcement for added strength and long term stability.

ACCESSORIES

The divine is in the details. Belgard offers caps, columns and other accessories to complement any hardscape design. Mix textures to add a modern look to a rough-hewn wall-face. Include a cap in a complementing color to add visual interest. The possibilities are endless!

Consult a Belgard contractor for information on all of our wall products and to receive project design assistance through Belgard Design Studio.

Its active agents form an invisible bond that stops the penetration of contaminants, facilitating the maintenance of pavers. Water based, CB Protector does not release unpleasant fumes and is environmentally friendly.

SELECTING A CONTRACTOR

A hardscape project is an important investment in your home and selecting the right contractor is a critical decision. Don’t be afraid to ask a lot of questions. It’s important that you get to know your contractor so that you can work together as a team to create your ideal outdoor living space.

WHAT TO ASK

Are you certified?
Inquire about specialized certifications and training from organizations like the Interlocking Concrete Paver Institute (ICPI).

Are you insured?
It’s important to hire a contractor who can provide proof of insurance and is able to guarantee their work for a period of at least three years after the installation.

Can I get a reference?
Ask for customer references and to see photos of past projects, both for design ideas and to get a sense of the contractor’s level of creativity, expertise and work ethic. Ask for an address or two and check out the workmanship up close, with the homeowner’s permission of course.

What isn’t covered in your estimate?
Determine upfront which aspects of the project the contractor can handle. Will their team manage landscaping, plumbing, irrigation and lighting or will you be expected to handle this separately?

What’s the schedule?
Be sure to get a complete understanding of payment terms, estimated start date and turn-around time.

CHECKLIST FOR CONTRACTOR:

- Industry Certification (ICPI, NCMA, SRW)
- Proof of Insurance
- Workmanship Guarantee (1-3 year minimum)
- Business License/Contractor’s license (where applicable)
- Work Schedule
- Price Estimate
- Scope of Work/Contract
- Referrals
