PREMIUM SAFETY EYEWEAR
PROTECTIVE EYEWEAR

Since the premium eyewear market is a multi-billion dollar market, it’s apparent that millions of people have a self-expressive connection with their premium eyewear and place extreme importance on brand recognition. Brand recognition of eyewear goes beyond lifestyle and plays a serious role in the industrial markets because premium brands are a catalyst for compliance.

STANDARDS & TESTING

• Eyeglasses are NOT safety glasses unless both the lenses and frame are in compliance with the specifications for safety eyewear described in the ANSI Z87.1 standard.

OTG STYLE
Page 29

PINK FRAME
Page 30
Our approach to design affords the end user a seamless link between the latest in style and cutting edge technology.

- Advanced lens coatings for superior scratch resistant and anti-fog properties.
- High-end materials for polycarbonate lenses, rubber nose pieces and frames.
- Polarized and High Definition lens options for enhanced optical clarity.
- De-centered cut lenses to match the focal point with actual line of sight, again ensuring optical clarity.
- 99.9% UVA and UVB protection.
- Stylized lens colors and state-of-the-art frames that premium-brand consumers prefer.

**FRAME TECHNOLOGY**

- TPR Technology increases the grip to keep glasses on your face.
- All polycarbonate lenses provide 99.9% UV protection and comply with ANSI Z87.1+ standards.
- Hard Coat provides scratch resistance.
- Flexible and durable Nylon materials on frames provide added durability and protection.

**ENHANCED OPTICAL CLARITY**

The optically correct portion of the lens blank is pinpointed and marked at the focal point. The de-centered lens is cut to match the focal point with actual line of sight, ensuring optical clarity.

**HD LENS TECHNOLOGY**

Crossfire’s High Definition (HD) Lens Technology provides enhanced vision by filtering the most damaging blue rays and allowing for more transmission of the High Definition light spectrum.
PERFORMANCE EYEWEAR

Just as premium eyewear has a role in today's safety programs, performance protective eyewear meets a variety of needs at jobsites around the globe, especially when you have to protect hundreds of workers.

All of our safety glasses are ANSI Z87.1+ certified and have many features that provide comfort and protection, including 99.9% UVA and UVB protection.

Plus, you will find numerous styles, lens colors, and price points to satisfy a variety of budgets and safety programs.

POLARIZED LENSES

The sun’s rays reflect off of surfaces such as sand, water, and snow causing glare. Crossfire’s polarized lens technology prevents glare by filtering out the reflected bent light and glare resulting in enhanced vision in harsh environments.
Crossfire® Polarized Safety Eyewear provides you with the availability of multiple styles and lens colors. Ranging from Blue Mirror to HD Brown lens options, we have eliminated the inconvenience of keeping up with multiple polarized glasses as you go from the jobsite to your favorite outdoor activity.

21427 Frame: Crystal Black

All glasses meet ANSI Z87.1+ standards, protect against 99.9% of harmful UV rays and include a hard coat polycarbonate lens to protect against scratches.
OTG STYLE EYEWEAR

WHY OTG STYLE?
Crossfire offers full coverage over-the-glass eyewear so your workers can remain safe while wearing their personal prescription eyewear. Available with temple length adjustment features and one piece lens designs that fit over most prescription glasses, our OTG eyewear provides you with an affordable and comfortable safety solution to help you meet ANSI Z87.1+ standards.

PINK FRAMES

WHY PINK FRAMES?

Our Pink Frames line of safety eyewear provides a comfortable fit for smaller faces and is available in a variety of styles, shapes, and lens colors. But don’t let the pink frames fool you. They offer the same high impact protection and comfort features as our other safety eyewear.

22528 | Frame: Pearl Pink  
Lens: Dark Smoke

2254 | Frame: Pearl Pink  
Lens: Clear

All glasses meet ANSI Z87.1+ standards, protect against 99.9% of harmful UV rays and include a hard coat polycarbonate lens to protect against scratches.
