Harmony

CUSTOM-BUILT ACRYLIC CABINET DOORS

Ultra gloss | Super matte | Metallic

Harmony

CUSTOM-BUILT ACRYLIC CABINET DOORS

Ultra gloss | Super matte | Metallic

DESCRIPTION

The **Harmony** collection offers a variety of doors and other custom-built components with unparalleled acrylic finishes. This collection will allow industry professionals to offer high-end acrylic products in a large selection of modern colors and finishes.

With their high resistance to heat, water, stains and discoloration, these products in the **Harmony** collection are ideal for all your kitchen projects, bathroom cabinets, storage units and other various furniture projects.

KEY FEATURES

- Excellent resistance to heat: does not retract
- Excellent resistance to moisture, water and stains
- Resistance to UV rays and discoloration
- Colors do not fade over time
- Matching edgebanding (ABS) with identical seamless finish

Doors with ultra gloss and metallic acrylic finish

- High-end glossy finish with 100% sheen level
- Mirror effect with fascinating visual
- Easy maintenance and resurfacing is possible

Doors with super matte acrylic finish

- Super-opaque lacquer effect with a silky smooth surface
- Super matte finish with no visible finger prints 
- Resistance to domestic cleaning products and stains to maintain a flawless look

RECOMMENDATIONS

The protective film must be removed after installation. For increased scratch resistance, doors and components must be cleaned with an all-purpose cleaner containing an anti-static agent (ex.: Pledge multi-surface). After cleaning, let stand for 24 hours before handling.

DOORS

Height minimum	Height maximum
3 3/4" (95 mm)	108 1/2" (2756 mm)
Width minimum	Width maximum
3 3/4" (95 mm)	49 1/2" (1257 mm)

EDGEBOARDING

ABS **Ultra gloss**, thickness 1 mm

ABS **Super matte**, thickness 1 mm

ABS **Metallic gloss**, thickness 1 mm

- Doors of more than 50" (1270 mm) in height are not guaranteed (against warping or anything similar)
- Edgebanding is perfectly matched with the chosen color and finish
- All edgebanding is applied with a polyurethane (PUR) adhesive, for exceptional bond without any visible glue line

COMPONENTS AND SPECIALTY PANELS

Components and specialty panels are available, built in the size of your choice. They can be edgebanded on all sides or have designated edges unfinished to your specifications. These can be used as end panels, fillers, accessory parts, etc.

When ordering, please indicate which edges will need edgebanding.

PROFILE

Doors and other components are built with a 16mm particle board core (carb2). Each side is covered with a 1.4mm acrylic sheet of the same color and finish (ultra gloss, super matte or metallic), for a **total thickness of 18.8mm**.

BUILT-IN HANDLES

HANDLE N°1

Completely Built-In Handle

Width: 6 3/4" (171 mm)

Height: 2" (51 mm)

Finish: 195 (Brushed Nickel)

HANDLES	DOORS	
POSITIONS	Width minimum	Height minimum
A-B-C-G	8 9/16" (218 mm)	3 3/4" (95 mm)
D-E-F-H	3 3/4" (95 mm)	8 9/16" (218 mm)

Available Positions

In the A to F positions, the longer side of the handle is positioned at 7/8" (22 mm) from the edge of the door.
 In the A, C, D and F positions, the short end of the handle is placed at 7/8" (22 mm) from the edge of the door.

HANDLE N°2

Peripheral Handle

Width: 5 7/16" (138 mm)

Height: 1 1/8" (29 mm)

Finish: 174 (Chrome Matte)

HANDLES	DOORS	
POSITIONS	Width minimum	Height minimum
A-B-C	7 7/16" (189 mm)	3 3/4" (95 mm)
D-E-F	3 3/4" (95 mm)	7 7/16" (189 mm)

Available Positions

ATTENTION:

The handle exceeds the door by 3/64" (1.2 mm). Please calculate enough space.

In the A, C, D and F positions, the short end of the handle is placed at 1" (25 mm) from the edge of the door.

CABINET DOORS and custom-made panels with textured and stunning visual effects

CCRMUS 2017

NATURE+

by CLEAF

Thermo-structured surface

This product line offers custom-made cabinet doors and panels with a thermo-structured surface that replicates both the look and feel of natural wood grain.

Our one-piece **RIVIERA**, three-piece **SIENNA** and five-piece **BELLAGIO** doors designed with our thermo-structured surface will enhance the appearance of any kitchen. Always at the leading edge, this collection is available in a variety of fashionable colors and textures.

These new models of **RIVIERA**, **SIENNA** and **BELLAGIO** European-design doors with 1 mm edgebanding allow for the creation of warm and contemporary designs.

Features:

- Stiles, rails and center panels made with an engineered core and a thermally structured surface
- Three- or five-piece doors with an assembly similar to wooden doors
- Exceptional resistance to heat, impact, scratch, stains, etc.
- Easy maintenance
- Five-year warranty

Custom-made panels and components

Our **custom-made panels and components** are manufactured to your specifications. They can be edgebanded on all sides with 1 mm ABS matching edgeband or have designated edges unfinished.

These components are ideal for use as end panels, island panels, fillers, accessory parts, etc. They are offered in three different thicknesses (19 mm, 38 mm and 57 mm).

CUT-TO-SIZE PANELS AND COMPONENTS

Thickness	Minimum Height	Minimum Width	Maximum Height	Maximum Width	Maximum (for warranty)
3/4" / 19 mm (horizontal grain)	2 3/4" / 70 mm	6 3/8" / 162 mm	108" / 2743 mm	48" / 1219 mm	81" / 2057 mm
3/4" / 19 mm (vertical grain)	6 3/8" / 162 mm	2 3/4" / 70 mm	108" / 2743 mm	48" / 1219 mm	81" / 2057 mm
1 1/2" / 38 mm (vertical grain)	4" / 102 mm	4" / 102 mm	108" / 2743 mm	48" / 1219 mm	81" / 2057 mm

Maximum height varies depending on the wood grain direction (horizontal or vertical) on the length of the panel. Check specifications on color chart.

Specify which sides need to be edgebanded.

Our doors and drawer fronts have a standard vertical or horizontal wood grain for both sequencing methods.

TYPES OF SEQUENCING

Non-sequenced method

The production of doors is done randomly, they will be fabricated at random and each one will display its own characteristics (graining, shade, etc.). This method is the standard method of production in the industry.

Sequenced method*

The production of doors takes into account the exact position of each door relative to the next; each door becomes a visual extension of adjacent doors. This method results in a harmonious look for the entire project. A surcharge for this method is applied. Please use our WEB program to order. Production plan required.

* Sequenced method is available in one cabinet only.

* Available only for the Riviera (slab) model.

OPTIONS

Edgebanding

Will cover 4 edges of the door. You can choose any type of edgebanding to match with your doors.

For color availability, refer to the color guide of **Brillanté Collection** (see back of brochure).

ABS Solid Color, 1 mm thick

Acrylic 3D 2-Tone, 1 mm thick

ABS Acero, 1 mm thick

PROFILES

The door is made with a 18mm thick MDF panel covered on both sides with a decorative paper and laminated. A high gloss finish is then applied to the outer side of the panel and a matte finish to the interior side. Edges are covered by the edgebanding of your choice.

Brillanté

Doors and components

COMPLEMENTARY PRODUCTS

Edgebanding

Each color goes perfectly with an identical (ABS Solid Color), two-tone (Acrylic 3D 2-Tone) or silver (ABS Acero) edgebanding.

ABS Solid Color, 1 mm thick

Acrylic 3D 2-Tone, 1 mm thick

ABS Acero*, 1 mm thick

* This edge can be used with any colors and patterns of your choice.

Moldings and Light Shields

Moldings smaller than 4" (101.6mm) in height will only have edgebanding on 3 sides.

Visit www.richelieu.com under the Cabinet Doors / Brillanté Doors section to create moldings according to your needs.

CCRMUS 2017

Custom-made panels and components

Our custom-made panels and components are manufactured to your specifications. They can be edgebanded on all sides with 1mm matching edgeband or have designated edges unfinished. These components are ideal for use as end panels, fillers, accessory parts, etc.

When ordering, please indicate which edges should be square and whether they should be edgebanded or not.

Note that **minimum** dimension for a component part without edgebanding is 1" (25 mm) on the width or the length.

Specify which sides need to be edgebanded.

Types of sequencing

Our doors can be manufactured either in a sequenced way or not. Our doors and drawer fronts have a standard vertical or horizontal wood grain for both types of sequencing methods.

Non-sequenced method

The production of doors is done randomly. That is, they will be fabricated at random and each one will display its own characteristics (graining, shades, etc.). This method is the standard method of production in the industry.

Sequenced method*

The production of doors takes into account the exact position of each door relative to the next; each door becomes a visual extension of adjacent doors. This method results in a harmonious look for the entire work, and a surcharge for this method applies (maximum 4' x 8' and built-in handles not available).

* Production plan required.

Doors and components

The European look of the super matte **Zenit** collection offers many opportunities for woodworking professionals to carry out any type of project. These doors are the result of applying state of the art lacquering technologies combined with the latest generation of materials which allows the creation of modern and elegant combinations for kitchens, bathrooms, and closet organizers.

[The **Zenit** collection includes intense and attractive super matte solid colors.]

Key Features

- 18 mm (23/32 in) MDF substrate for all doors and custom-made components
- Edgebanding color match, super matte finish
- Doors are edgebanded using PUR adhesive
- Front and back of the components have a matching back in a matte (suede) finish
- High resistance to stain
- High resistance to abrasion
- High thermal resistance
- Easy maintenance

Recommendation

We recommend the installation of a third hinge on doors of 36" (914 mm) and more.

Doors and components

One-Piece (Slab)

Height	
Minimum	Maximum
3 3/4"	106 1/2"
95.25 mm	2705 mm
Width	
Minimum	Maximum
3 3/4"	47 1/4"
95.25 mm	1200 mm

Edgebanding

The Zenit doors are built with a 1 mm edgebanding. The edgebanding is glued with a PUR adhesive which makes it waterproof and highly durable.

Will cover 4 edges of the door.

Matching PVC super matte edgebanding 1 mm thickness

Custom-made panels and components

Our custom-made panels and components are manufactured to your specifications. They can be edgebanded on all sides with 1mm matching edgeband or have designated edges unfinished. These components are ideal for use as end panels, fillers, accessory parts, etc.

When ordering, please indicate which edges should be square and whether they should be edgebanded or not.

Specify which sides need to be edgebanded.

Profile

The door is made with a 18mm (23/32 in) thick MDF panel covered on both sides with a decorative paper and laminated. A super matte polyester lacquer is then applied to the front side and a matte melamine finish to the back side of the panel. The edges are covered with a 1mm PVC edgebanding.

EXPLORE THE POSSIBILITIES WITH OUR CUSTOM-MADE SOLUTIONS

IMAGINE

We believe in the power of clean design and innovative materials.

Our vision in bringing European influence to our market is shaped by these principles. With us, you will find a partner who shares your appreciation for design and inspires you to be limited only by your imagination.

INNOVATE

We are recognized for having clean and modern designs where tight tolerances and rigid specifications are a hallmark.

Our commitment to upholding these requirements has positioned us to provide innovative solutions and better serve our clients.

This enables us to achieve the highest quality standards with minimal lead times.

INSPIRE

We believe that inspiration should be contagious and last a lifetime. You will be inspired over and over again by the compilation of products within these pages.

We are excited about the opportunity to partner with you to create new and rewarding designs for your next projects.

DIVIDER PROFILE RIC20

The RIC20 divider can be installed with our RIC01 and RIC06 profiles.

Divider rails can be used especially with larger doors to create a very nice design.

Available in all finishes.

PROFILES

PROFILE FINISHES AND PRE-DRILLED HOLES

PROFILE FINISHES

All of our aluminum finishes are anodized and impeccably uniform.
 Some finishes have a brushed texture (Stainless Steel, Bright Stainless Steel, and Brushed Black).

Anodized Gray (Aluminum)

Anodized Black Matte

Clear Stainless Steel

Brushed Black

Stainless Steel

Clear Polished Chrome

PRE-DRILLED HOLES (GROMMET)

All glass inserts with pre-drilled holes are tempered or have a safety backing (back-painted and mirror glass). Always insert the grommets supplied with the doors into the 7 mm drilled holes before attempting to attach the door. Only a manual screwdriver with the appropriate bit should be used. Never over-tighten the screws.

Grommet

Glass

Handle

PROFILES

BACK-PAINTED INSERT

COLOR INSERT

Our back-painted glass insert option is made with a high-quality water-based lacquer that provides a sense of depth with its high-gloss sheen or a warm look with its low-sheen solid colors. Heat fuses your color choice to the clear glass and achieves the perfect look for your project. Standard glass thickness is 5/32" (4 mm).

Pale Green

All back-painted glass has a security film.

A special order option is also available to achieve any custom color.

See page 15A32 for information on pre-drilled holes.

When the inherent reflectivity of glass meets **distinctive colors**, the result is a **durable look** that is unmistakable in any environment.

INSERTS

STANDARD GLASS INSERT

CLASSIC GLASS INSERT

We provide an array of innovative patterns and the ability to choose the best options to transform any interior environment without sacrificing design. The glass texture is found on the inside of the door to facilitate cleaning. In addition, the texture is always in a vertical position. Standard glass thickness is 5/32" (4 mm).

Glass should be tempered if:

- The door is located less than 16" (406 mm) from the floor.
- The surface area exceeds 8 sq.ft.

INSERTS

See page 15A32 for information on pre-drilled holes.

OTHER OPTIONS

MIRROR INSERT

For a more striking design, our mirror options are ideal for a touch of contemporary or transitional design. All of our mirrors have a safety backing to prevent shattering. Standard glass thickness is 5/32" (4 mm). See page 15A32 for information on pre-drilled holes.

Clear Mirror

Smoked Gray Mirror

Gray Satin Mirror

Satin Mirror

Bronze Satin Mirror

MAGNETIC GLASS INSERT

Our insert comes with a metal backer and is fused in any color. The magnetic glass comes in two variations: a rounded corner for frameless application or enclosed with an aluminum frame. Magnets are required to hold items securely in place. Standard dry-erase markers may be used.

Ideal as an accent door in your home environment, for example your kitchen or home office.

MARKER-BOARD GLASS INSERT

Perfect for home environment, our glass marker-board is constructed with a thin-gauge steel backing. Durable and adaptable, you can easily write and erase with markers, put sticky notes, or use magnets.

Our glass marker-board is available in custom sizes for cabinet doors and wall mounting applications.

FACESTONE INSERT (Special Order Only)

The Facestone collection has a fine homogeneous grain generated by metamorphic rocks derived from original sedimentary stones made of clay and volcanic ash.

Panel Size: 48" x 96" (2.44 x 1.22 m) x 1/32" (1 mm).
 FS914 Graphite thickness is also available in 3/32" (2 mm).

FS914
 Facestone Graphite

FS915

INSERTS

DRILLING AND MECHANISMS

DRILLING FOR ALUMINUM FRAMED DOORS

Richelieu carries a wide range of hinges for various applications.

STANDARD PROFILE

- Minimum drilling clearance required is 3 1/4" (82 mm) for **wide** profiles :
 RIC03, RIC06, RIC658, RIC12, RIC1258, RIC15, and RIC27.
- For the RIC03P profile, the minimum drilling clearance required is 4 5/16" (110 mm) on the handle side.
- The drilling of our wide profiles allows the installation of most standard (35 mm) cup hinges.
- Cabinets with 3/4" (19 mm) gable require a 1/4" (6 mm) offset on wide profile.

NARROW PROFILE

- Minimum drilling clearance required is 2 3/8" (60 mm) for **narrow** profile: RIC01

OPENING SYSTEMS - SUSPENSION ARM

Aluminum framed doors are perfectly adapted for technologically advanced hardware. Their pure lines combined with sophisticated and innovative mechanisms create modern and stylish environments.

The choice of mounting brackets accommodates narrow or wide profiles.

SUSPENSION ARM - KRABY

Add a touch of elegance and functionality to your cabinets with the Kraby lid stays.
 For the Kimana hinge, visit our website for additional information.

For more details, download the spec sheet for narrow and standard frame hinges under the Aluminum Framed Door Section.

FUNCTIONAL HARDWARE

SL SYSTEMS

FOR CABINET DOORS

SL20 SYSTEM*

- Adapts to all standard profile models
- Installs on the inside of the cabinet
- Choice of simple or double track
- Top and bottom roller wheel configuration
- Uses the same aluminum track at top and bottom of the cabinet
- Adjustable roller height from 0 mm to + 5 mm
- Recommended for doors up to 48" (1219 mm) in height, maximum weight 20 kg. (44 lb) per door

SL35 SYSTEM*

- Adapts to all standard profile models
- Installs on the inside of the cabinet
- Top-hung sliding system
- Guide on bottom surface
- Soft and quiet sliding
- Choice of simple or double track
- Recommended for doors over 48" (1219 mm) in height, maximum weight 35 kg. (77 lb) per door

SL60 SYSTEM*

True European styling aluminum frame doors with up to three different vertical profiles to fully customize the facing of the cabinet or closet.

Maximum height: 120" (3048 mm)
 Maximum width: 60" (1524 mm)
 Inserts 4 mm or 10 mm in thickness.

The maximum size of the door is also limited by the maximum weight supported by the sliding system.

Maximum weight: 60 kg. (132 lb) per door

* The SL20, SL35, and SL60 sliding systems for cabinet doors are included with your door order. They will be pre-drilled and ready to be installed. Use Richelieu's cabinet door website to place your orders.

For more details, download the spec sheet for sliding systems under the Aluminum Framed Door Section.

CCRMUS 2017

EXCELSIUS
 CABINET DOORS

Description

The **Polyester 5-Piece Collection** doors offer countless possibilities for kitchen designs to professionals. Moreover, these doors are also offered with a complete line of complementary products in matching colors: melamine panels, high-pressure laminate, moldings, edgebanding and an array of components.

The **Polyester 5-Piece Collection** doors are offered in many designs and colors. These trendy products are synonymous with quality, beauty and durability for all your kitchen, bathroom, closet organizer and various furniture projects.

CHARACTERISTICS:

- Moldings made of polyester laminate on MDF with a 1/4" melamine center
- Built just like a wooden door (in 5 pieces- face and back)
- The direction of the grain follows the direction of the molding
- Perpendicular direction of grain available
- Back & front in relief with matching colors
- Excellent thermal resistance
- Available in many models and colors
- Can be matched perfectly to other materials (melamine panels, HPL, edgebanding, moldings.)
- Easy maintenance
- Reduced profile is available for some models
- The industry's best production lead-times

NOMENCLATURE:

Drawer front:

Panel where the woodgrain of the 1/4" melamine center is horizontal

Door:

Panel where the woodgrain of the 1/4" melamine center is vertical

Reduced profile:

A smaller width molding available for some models only.

Glass frame:

Frame only, no center. A vinyl molding to be inserted in the groove is supplied in order to hold the glass in place.

Door with Lumicor®:

Door for which the melamine center has been replaced by a 1/4" acrylic decorative panel.

RECOMMENDATION:

We recommend the use of a third hinge (non-sprung) on doors measuring 36" and more in height.

POLYESTER
5-PIECE
 COLLECTION

Grooved center

Options

The **5-Piece Collection** doors can also be made with a v-groove center. The grooves are made of two (2) micro "V" that are then dyed to bring out the beauty of the door (see list below). Using a manufacturing technique exclusive to **Excelsius**, each door has a central double groove with adjacent grooves every 1.5 inches.

These grooved center doors are available in all models and colors. A maximum height of 72 inches (1828 mm) and a maximum width of 48 inches (1219 mm) must be respected.

AVAILABLE MODELS	Available colors	Maximum (height)	Maximum (width)	Maximum (Combined W x H)
All models	All colors	72" (1828 mm)	48" (1219 mm)	9 sq. ft. (0.83 sq. m.)

Also available

1/4" MELAMINE – 32" x 48" or 48" x 48" Dolomite finish or *Rio* and *Medina* textured finishes

Models S400 & S800 with horizontal cross piece

Model S400

The doors *S400 and S800 with horizontal cross piece* offer many possibilities. You can have different combinations of materials in the same door.

The position of the horizontal cross piece is decided by the customer. The height of the top section is measured from the top of the door to the center of the horizontal cross piece.

CHOICES FOR THE TOP SECTION

- Melamine
- Grooved center
- Glass frame
- Lumicor®
- Mullion glass frame *
- Decorative metal *

CHOICES FOR THE BOTTOM SECTION

- Melamine
- Grooved center
- Glass frame
- Lumicor®
- Mullion glass frame *
- Decorative metal *

* Must respect the size tolerance already established (see decorative metal p.14A43 and mullion glass frame p.14A41).

5-PIECE
 COLLECTION

Decorative centers

The **5-Piece Collection** doors give you the possibility to order your doors with a regular acrylic decorative center (delivered not assembled to frame) or with a **Lumicor®** center, installed at the factory.

The **Lumicor®** acrylic center is fully integrated into the molding before the door is assembled. The result is a decorative door with an impeccable finish.

The regular acrylic is held in place by a rubber support molding (supplied with the glass frame). Delivered not assembled.

5-PIECE
COLLECTION

Components

The components are available for the **5-Piece Collection**, using the door styles of the **Moderno Collection**.

Only available with **Rio** and **Medina** textured colors.

Components and specialty panels

Our specialty panels, manufactured in the size of your choice, have one or more square edges (not machined), optionally edgebanded with a broad selection of edgebanding. They are suitable as doors on a corner module (Lazy Susan), as end panels, fillers, etc.

When ordering, please indicate which edges should be square and whether they should be edgebanded or not. Laminate sheets, edgebanding, and different types of panels are also available.

Please consult the price list and check availability with Richelieu.

Production Lead-times

REGULAR ORDERS:

The maximum production lead-time (date leaving the factory) for a regular order is ten business days. To compute the business days, start counting from the day following reception of the signed order at our factory. Whenever possible, we will produce the orders as soon as possible. If, for reasons beyond our control, production time should exceed ten business days, we will notify the customer immediately.

SPECIAL ORDERS: ADDITION*

ADDITION (1 to 5 units)

- Order received before 10:30 AM: Leaves the factory the same day*†
- Order received after 10:30 AM: Leaves the factory the following business day

ADDITION (6 units and more)

- Orders of more than 5 units that are marked "ADDITION" will be processed as normal orders with a maximum production time of ten business days.

SPECIAL ORDERS: REMAKE**

REMAKE (1 to 5 units)

- Order received before 10:30 AM: Leaves the factory the same day†
- Order received after 10:30 AM: Leaves the factory the following business day

REMAKE (6 to 10 units)

- Order received before 10:30 AM: Leaves the factory the following business day
- Order received after 10:30 AM: Leaves the factory on the second business day

REMAKE (11 units and more)

- Order received before 10:30 AM: Leaves the factory on the second business day
- Order received after 10:30 AM: Leaves the factory on the third business day

Note: The time given is the reception time of the order by email at our factory and NOT at Richelieu.

*ADDITION: Error or omission on the part of the cabinet maker on an order already produced and delivered during the previous 30 days.

**REMAKE: Error or omission on the part of the manufacturer, remakes involve no cost for the cabinet maker.

†This delay could be of 2 business days during winter time.

EXPRESS ORDERS:

We offer an Express service for your door orders from 1 to 5 business days depending on your needs (the business days start from the day after the order is confirmed).

EXCELSIUS
CABINET DOORS

Warranty

All doors from the **5-Piece Collection** are covered by a **5-year** limited warranty against all manufacturing defects.

INCLUDED:

(Covered by the warranty)

- Wrong size (tolerance $\pm 1/32"$ or ± 0.8 mm)
- Out of square (tolerance $\pm 1/32"$ or ± 0.8 mm out of square)
- Warping greater than tolerance (see General Rules)
- Loosening of polyester paper from MDF substrate
- Delamination of MDF substrate

For such inclusions to be covered, the door must not have suffered any shocks, exposure to a source of heat, contact with water or any other liquid substances. Moreover, it must have been installed according to recognized industry practices.

GENERAL RULES:

- All claims must be lodged before the expiration of the warranty period, i.e., 5 years from the delivery date of the doors. Replacement or repair of a door may in no case extend the original 5-year warranty.
- Both invoice and defective door must be returned to **Lecxeco inc.** for expert examination.
- The doors to be replaced will be invoiced at 100% and a credit will be produced following examination of the defective doors.
- If, at the time the warranty is being used, the color and/or model of the doors in question are no longer available for reasons beyond our control, we reserve the right to replace (or credit) the defective door(s) with another equivalent color or model without compensation for the balance of the doors of the same order.
- Transportation costs for the delivery of the replacement doors are subject to the same coverage percentages as the doors being replaced.
- The warranty is limited to the replacement or repair of the defective door without any compensation for labour and/or loss of use of the product.
- The warping warranty only applies to doors 32" or less with a 1/8" tolerance (measured at center, with the door flat on a very straight surface, e.g., panel saw).
- Warping problems must be detected and reported within 10 days following reception of the order, and the defective door(s) must not have been altered in any way (drilled for hinges, handles installed, etc.).
- Door claims that involve breakage at the reception of the order with no damaged box must be made within five days following reception of the order, and the defective door(s) must not have been altered in any way (drilled for hinges, handles installed, etc.). The door(s) in question must be returned to **Lecxeco inc.**
- Doors measuring 50" and more are not covered by any warranty.
- The warranty coverage is prorated as follows:
 - 100% for the first two years
 - 75% for the third year
 - 50% for the fourth year
 - 25% for the fifth year

NOT INCLUDED:

(Not covered by the warranty)

- Polyester, melamine, joint and assembly breaks following shock, negligence, misuse, exposure to a source of excessive heat (over 300° F) or contact with water or other liquid substance (swelling of material)
- All defects that result from misuse and/or use not in accordance with recognized industry practices
- Deterioration of a door that was exposed to abnormal temperature and/or humidity conditions
- Burns on one of the materials
- Stains on one of the door components
- Degradation of the product due to material aging or normal wear and tear

DOORS DAMAGED DURING TRANSPORTATION:

When you receive the boxes, always make sure they have not been damaged during transportation before signing the delivery document. If any of the boxes have been damaged, write "Damaged Box" or "Damaged Boxes" on the waybill. You must keep the box(es) in question as well as the doors to be replaced for our claim to the transportation company. Notify us immediately about the problem so that repaired doors or replacement doors may be shipped to you as soon as possible.

MISSING BOXES:

When you receive the boxes, please make sure the number of boxes delivered matches the number shown on the delivery document. If some boxes are missing, write "Missing Boxes" on the document before signing it, indicating the number of missing boxes. Notify us immediately about the problem so that a search can be made to locate the missing package(s).

DOVETAIL ASSEMBLY

Ready-to-Assemble TAMBOUR DOOR SYSTEMS

Quick Installation requires no cutting

- ✓ Slat width of 1"
- ✓ Stainless steel or aluminum finish
- ✓ Various door widths available
- ✓ Door height of 48"
- ✓ C3 mechanism, heavy-duty roller system

For more information
ask your representative

No.	Exterior width	Color
KITAMB18ALU25MM	18"	Aluminum
KITAMB18SS25MM	18"	Stainless steel
KITAMB24ALU25MM	24"	Aluminum
KITAMB24SS25MM	24"	Stainless steel
KITAMB30ALU25MM	30"	Aluminum
KITAMB30SS25MM	30"	Stainless steel
KITAMB36ALU25MM	36"	Aluminum
KITAMB36SS25MM	36"	Stainless steel

Note: Sizes for C3 kits are calculated as outside cabinet dimensions and prepared for a three-sided cabinet. A notch in the track is necessary for four-sided cabinet use. Using a 5/8" (16 mm) board thickness will leave a flush result. Using a 3/4" (19 mm) board thickness will leave a 3-mm reveal result. We recommend that you edge the face of the cabinet before you apply the face track.

Tambour Systems

Tambour Door Kit with Exact Widths – 25 mm

Tambour doors provide a unique and high quality detail in interior planning, especially in kitchens and offices. The dimensions of the set are based on the external dimensions of cabinets and are suitable for a three-sided cabinet. A notch in the rail is required for a four-sided cabinet. Using a panel with a thickness of 5/8" (16 mm) gives a precise finish between the panel and rail, while the use of a panel with a thickness of 3/4" (19 mm) gives a finish that reveals 3 mm of panel.

Specification(s):

- Does not require cutting

Sold by unit

Metallic Line Tambour Slats – Stainless Steel Finish

Metallic Line tambour slats for a genuine metallic look with a stainless steel finish. Slats are composed of a metal extrusion on a polymer base. Consult a blade specialist to determine the blade requirements for cutting both the plastic and metal components. Extensions should be cut with a hand saw only! If you have chosen the heavy-duty roller system, requires #560510 PVC slats as starter slats (total interior length of slats 315 mm, or 7 pieces with 3 chambers each) to join the metallic slats to the heavy-duty system for smooth opening and closing of your mechanism. This also saves on the total cost of your system. We strongly recommend that you order the products TUBECART and CAP (two CAPs per TUBECART) to package this product.

Sold by unit

PRODUCT	LENGTH	WIDTH	THICKNESS	QTY/BOX
560925	98-27/64" (2500 mm)	1" (25 mm)	5/16" (8 mm)	168

Suggested Product(s): 868500 – Tape, 560790 – Tambour Slat Glider

PVC Tambour Slats – Aluminum Finish

PVC tambour slats, aluminum color, which can be applied on a vertical or horizontal tambour system. Each slat is composed of three chambers intertwined to form a single slat. The total size of each piece is 45 mm in width and 2.5 m in length (see technical drawing). Slats can be easily cut with a radial arm saw blade. Note: PVC starter slats must be installed together with your metallic tambour slats. The interior length to be wound on the roller mechanism should total 315 mm, in order to ensure smooth opening and closing of your mechanism. This also saves on the total cost of your system. We strongly recommend that you order the products TUBECART and CAP (two CAPs per TUBECART) to package this product.

Sold by unit
