

Thermo-Rite[®]

PRODUCT CATALOG

A HISTORY OF EXCELLENCE

Founded in 1942 in Akron, Ohio, Thermo-Rite Manufacturing originated the tempered glass fireplace enclosure. In fact, Thermo-Rite was awarded the first United States Patent for tempered glass fireplace enclosures... a patent held exclusively by Thermo-Rite from 1943 to 1968. Even today, every Thermo-Rite product... without exception... is produced in our Akron, Ohio facility.

From our founding to the present, Thermo-Rite has been a market pacesetter. We began as a custom masonry door maker. Through continuous innovation, we were soon leading the industry in the production and popularization of high quality stock fireplace doors.

Over the years, Thermo-Rite evolved with a wide and varied offering of models, styles and sizes to satisfy our customers' needs for glass doors on custom masonry fireplaces, stock masonry fireplaces and many zero-clearance fireplaces. To please even the most discriminating customer, Thermo-Rite offers the industry's largest in-stock selection of distinctive styles and finishes with a wide range of sizes to fit any décor and application.

If a stock door just won't do, Thermo-Rite can custom-make a glass fireplace enclosure to suit any

specifications. Like our stock fireplace enclosures, our custom made fireplace enclosure options include anodized aluminum, steel, solid brass and brass-plated steel.

Thermo-Rite makes glass fireplace enclosures... exclusively. This single product focus enables us to offer quality fireplace enclosures... priced competitively...with on-time delivery... and, most importantly, service after-the-sale.

Another guiding principle that sets Thermo-Rite apart is its uncompromising commitment to quality materials and precision manufacturing. The design of Thermo-Rite fireplace enclosures are notable for their attention to detail which results in ease of installation, trouble-free operation and timeless beauty.

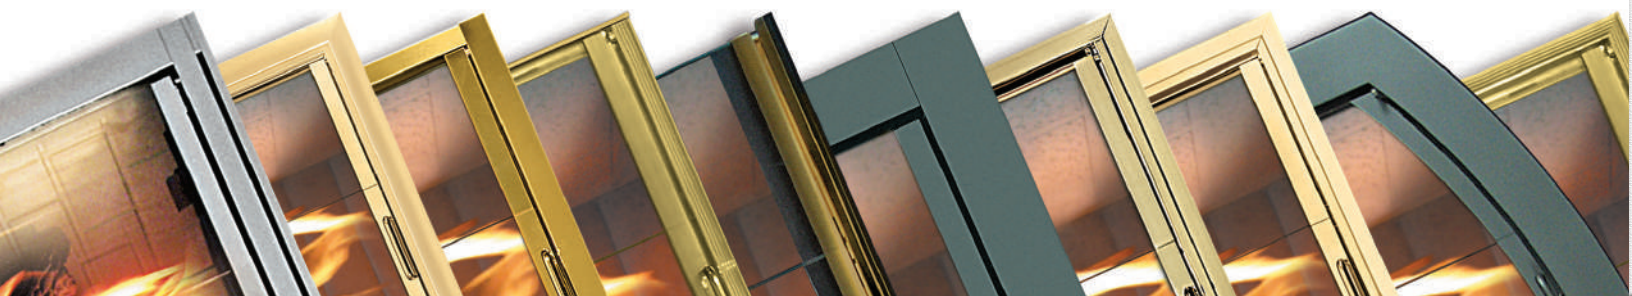

Every aspect of Thermo-Rite products... from design and manufacture... to assembly... final inspection... and packaging is monitored and controlled at our modern Akron facility to ensure easy, convenient installation, superior performance and lasting beauty.

**QUALITY...SERVICE...SUPPORT.

Artisan Series

by Thermo-Rite

WINDSOR Pg: 24

Shown with Contemporary option in Textured Black

Thermo-Rite Manufacturing's Newest Premium Custom made door - The Windsor, is a single piece steel laser cut frame.

The Windsor will premiere with two additional door options: The Supreme and Contemporary Styles.

Why will The Windsor be the Best door to purchase this year?

- * All Steel Door
- * Laser Cut
- * 2 Door Options
- * A price point that can't be beat

Contact your sales representative for more details and when the Windsor will be available for order.

CONTOUR Pg: 25

Shown in Textured Chestnut

Hidden hinges, are just one attribute that sets the Contour apart from the competition. Laser cut steel and rounded edges on both the outside of the frame and both edges of the channels.

VALENCIA Pg: 27

Shown in Textured Black

Strong, Gothic, riveted cross overlapping joints will send your home to a simpler time. The Valencia will give your current fireplace that Old world feel you were looking for.

BEAUREGARD Pg: 26

Shown in Textured Black

Beautiful rounded edges give a soft and unique look to this modern fireplace enclosure. The Beauregard will keep your home warm, while giving your living space a whole new look.

HERITAGE Pg: 28

Shown in Textured Old Iron

For more than two decades the Heritage has been flagship premium level door and remains timeless, in both style and durability.

2 DAY SHIP PROGRAM

Thermo-Rite's dedication to quality in year's past most remodel projects were either done well or done fast. As the oldest fireplace door manufacturer in the world we have seen the sacrifice of quality for speed one too many times, so we decided to do something about it.

The Thermo-Rite 2 Day ship program offers both masonry and zero clearance doors with models plucked directly from our custom lineup, the only difference is that these doors are stocked in our warehouse ready for your fireplace. This collection consists of door styles ranging from the contemporary to classic, aluminum to steel, clean to traditional, in some of the most popular sizes to fit most fireplaces.

Thermo-Rite's dedication to quality is put into each of their doors and these are no exception. While we will never rush building excellence into every one of our doors, the Thermo-Rite 2 Day ship program ensures a speedy delivery every time.

CELEBRITY Pg: 06

Shown in Textured Black

Traditional styling, combined with Mesh Curtains for the complete package that the competition can't touch.

CHALET Pg: 07

Shown in Textured Black

Clean Contemporary lines and cabinet style doors make this an instant classic that compliments any décor. With a low profile front that maximizes the viewing area.

HERITAGE 2 DAY Pg: 10

Shown in Textured Black

Our most popular premium steel door. Flush finish, clean lines & Clear-view Doors. This version has a 2½" wide frame and mesh curtains included.

NORWEGIAN-Z Pg: 08

Shown in Textured Black

The first ever 2 Day Ship Zero Clearance fireplace enclosure and another great addition to our 2 Day Ship door program. We originally designed this door for Norwegian builders whose demands were to maximize viewing area while offering the highest quality fireplace door possible.

Mesh Curtain	Heavy 19 gauge mesh curtain	\$95.00
Mesh Door	1/8" flattened expanded steel, 25 gauge mesh doors	\$125.00

Note: Options will delay door delivery

HOW TO ORDER

- Select the model from the sizing chart (with the appropriate prefix and suffix code) and size to fit. The opening widths in the above chart are based upon using standard mounting hardware for installation. Additional overlap on the width of 1" per side or a total of 3" per side is available by ordering optional hardware pack 10740.

Example of ordering a Chalet stock door: **CB3626CV1**

- When using a mesh curtain, the maximum overlap on the height is 2" from the lintel and maximum overlap on the width is 3" on each side. Example of ordering: **C-3626**

- When using a mesh door, the maximum overlap on the height is 2 3/4" and maximum overlap on the width is 3" on each side. Example: **MD-3626**

2 DAY SHIP

NORWEGIAN-Z *Welded Steel*

Frame Width	1/8"
Frame Depth	3/4"

Shown in Textured Black

The Norwegian-Z is the first ever 2 Day Ship Zero Clearance fireplace enclosure and another great addition to our 2 Day Ship door program.

Base unit widths are 36, 38 and 42" wide (base unit refers to the door and frame with no spacers). For openings taller than the base height we incorporate a system of **Trim Spacers** (included), either a single or pair, that allow the door to fit a wide variety of openings and some of the industry's most popular models past and present.

Trim Spacers Top & Bottom

*When ordering standard masonry overlap fit doors it is best to go with the smaller frame size, if 2 sizes will fit

Standard	Description	List Price
Glass	1/4" Grey or Clear or Bronze with lifetime warranty	N/C
Finish	Textured Black	N/C
Options	Description	List Price
Door Style	FS2, CV2, TPM, CMD	N/C
Clearview or Twin Panel Mesh	Instead of Glass Doors Choose this Mesh Door option	N/C
Channel/Handle Finishes	Stainless, Antique	\$55.00
Mesh Curtain	Heavy 19 Gauge mesh curtain	\$95.00
Mesh Door	1/8" flattened expanded steel, 25 gauge mesh doors	\$125.00
*Paint Surcharge for Other Heritage Finishes (painted)	Bronze Iron, Copper, Brown, Gold Antique, Grey Iron, Moss Iron, Natural Iron, Pewter, New Rust, Old Copper, Old Iron, Silver Antique, Chestnut, Rust	\$40.00 (net)

Painted Finishes are Non-Returnable

*Paint Surcharge is a Net Charge and should NOT be calculated with a discount to determine cost.

*Use Custom **Order Form #2**, for custom sizes, add **\$200.00** to the list price of the size for your fireplace opening stock door. For larger sizes, contact the factory

HOW TO ORDER

• Select the model from the sizing chart (with the appropriate prefix and suffix code) and size to fit. The opening widths in the above chart are based upon using standard mounting hardware for installation. Additional overlap on the width of 1" per side or a total of 3" per side is available by ordering optional hardware pack 10740.

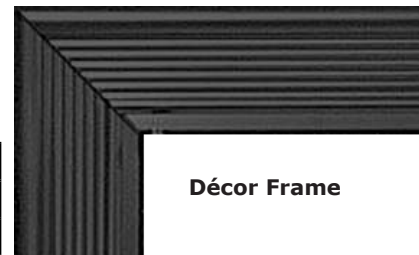

• Example of ordering a Reserve stock door in Copper finish: **RE-CU-3322FS2**
 • When using a mesh curtain, the maximum overlap on the height is 2" from the lintel and maximum overlap on the width is 3" on each side.
 Example of ordering: **C-3322**
 • When using a mesh door, the maximum overlap on the height is 2 3/4" and maximum overlap on the width is 3" on each side. Example: **MD-3322**

Glass	1/4" Grey or Clear or Bronze with lifetime warranty	N/C
Options	Description	List Price
Door Style	CV2, FS2	N/C
Glass Channel/ Handle Finishes	Stainless, Antique	\$55.00
Mesh Door	1/8" flattened expanded steel, 25 gauge mesh doors (FS2 only)	\$125.00
Frame Inserts	Polished, Black, Brushed Silver, Satin	\$149.00
*Paint Surcharge	Textured Black	\$20.00 (net)
*Paint Surcharge Other Heritage Finishes	Bronze Iron, Copper, Brown, Gold Antique, Grey Iron, Moss Iron, Natural Iron, Pewter, New Rust, Old Copper, Old Iron, Silver Antique, Chestnut, Rust.	\$40.00 (net)

Painted Finishes are Non-Returnable.

*Paint Surcharge is a Net Charge and should NOT be calculated with a discount to determine cost.

For custom sizes use the following price chart and Order Form #7

Prices include choice of bronze, clear or grey glass.

Up to 36" wide X 24" high	\$899.00
Up to 42" wide X 28" high	\$989.00
Up to 48" wide X 29" high	\$1,079.00

HOW TO ORDER

- Use custom order form #7 and completely fill out all information requested.
- From the standard items chart above, select a finish adding a prefix code to the model number when ordering.
Example: **ZD**, or **ZDB**
- Select a door style adding a suffix code to the model number when ordering.
Example: **CV2** or **FS2**
- Select the model from the price chart (with the appropriate prefix and suffix code) and size to fit.
Example: **ZDB-MJ10 FS2**
- Decide on any of the optional accessories that fit your needs. To order optional mesh door add "MD" to basic model number.
Example: **MD-MJ10**

*Paint Surcharge is a Net Charge and should NOT be calculated with a discount to determine cost.

For custom sizes use the following price chart and Order Form #7

Prices include choice of bronze, clear or grey glass.

Up to 36" wide X 24" high	\$979.00
Up to 42" wide X 28" high	\$1,069.00
Up to 48" wide X 29" high	\$1,169.00

HOW TO ORDER

- Use custom order form #7 and completely fill out all information requested.
- From the standard items chart above, select a finish adding a prefix code to the model number when ordering. Example: **Z3, ZB3, or ZM3**
- Select a door style adding a suffix code to the model number when ordering. Example: **CV2 or FS2**
- Select the model from the price chart (with the appropriate prefix and suffix code) and size to fit. Example: **ZM3-MJ10 FS2**
- Decide on any of the optional accessories that fit your needs. To order optional mesh door add "MD" to basic model number. Example: **MD-MJ10**

CUSTOM MASONRY

ORDERING CUSTOM DOORS

Since its inception in 1942, Thermo-Rite Manufacturing has been recognized worldwide for its line of custom-made glass fireplace enclosures.

Our expertly designed and handcrafted custom doors are available in the Normandy, Chateau Collection, Direct-Vent Fireplace Accessory, Outdoor Patio Door, Heritage, Heritage Arch, Cameo, Phantom, Laser, Classic and Corner Unit models.

Each custom door starts with the dimensions that are provided by you, the dealer, on behalf of your customer. That is why precise measurements are vital to the end result of a perfectly fit door enclosure.

By following these key steps, you can ensure a perfect fit with each and every order:

1. Help your customer select the style of enclosure which best suits their fireplace style and complements their home décor.
2. Take precise measurements of their fireplace.
3. Select the appropriate Custom Order Form which appears on pages in the Retail Price List.
4. Complete this form by making sure that you have filled in all of the sections. You must mark at least one selection in all of the boxes.
5. Mail, e-mail, or fax your order into Thermo-Rite Manufacturing.

Full Heritage Arch shown in Textured Grey Iron.

PLEASE NOTE: Upon receipt of your mailed or faxed Custom Order Form, a Thermo-Rite representative will review the form for completeness and accuracy. At that point, your order will be entered into our system and an Order Acknowledgement Form will be faxed or e-mailed back to you for your review.

If we do not hear from you within two (2) working days as to any possible errors on the Order Acknowledgement Form, then we will proceed to move your order into the scheduling process. At that time, no changes can be made to a custom door order.

Since each custom-made door is handcrafted exclusively in our headquarters in Akron, Ohio, please allow an average of (4) weeks for delivery.

TEXTURED HERITAGE FINISHES

PLEASE NOTE: These color samples are approximate and may vary from actual door finish. Please consult factory color chips for accurate colors.

Textured 2 Tone Finish

Thermo-Rite is proud to offer 2 tone finishing to the Normandy Family of doors, introduced at no additional charge. 2 tone color combinations can make your custom door truly unique and adds an extra touch of detail to the design of your fireplace. Make a color stand out or blend two colors that add subtle hint of intrigue. Either way, 2 tone Normandy doors add that extra dimension to your fireplace's look.

Bar Stock Bottom	\$60.00
-------------------------	----------------

Note: Mesh curtains can be as much as 3/4" above the floor of the firebox depending on dimensions. The Bar Stock Bottom is recommended to hide this gap, and may also assist as a barrier for ash in wood burning applications.

Mesh only comes in Black

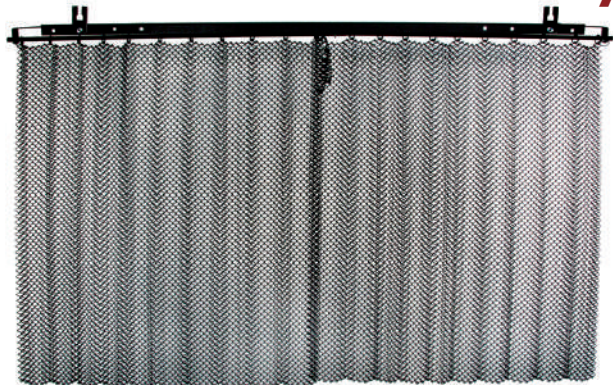

Bar Stock Mesh Top & Bottom

HOW TO ORDER

- Use custom order form #8 and completely fill out all information requested.
- Order must be mailed or faxed to Thermo-Rite.

CUSTOM MESH

Mesh Curtain Assembly

The Mesh Curtain Assembly is all the working hardware necessary to install mesh curtains in your fireplace. Lintel bar clamp mounting requires no drilling for easy installation. Custom sizing means each curtain is cut to meet your exacting needs for a truly tailored finish.

Mesh Curtain Replacement Panels:

Heavy 19 gauge wire. Finished w/rust preventative, high temp black enamel. Shipped via ground carrier. Includes two (2) mesh panels with pull handles and rings. Larger sizes are available - contact factory for pricing.

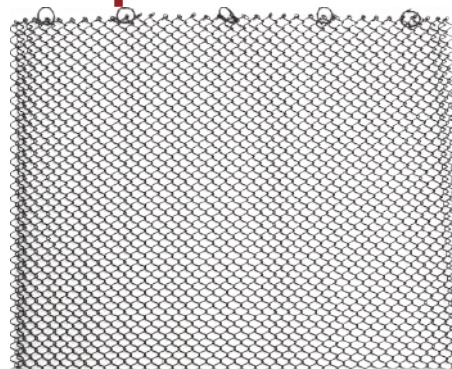

How to select Your Mesh Curtain Set

Measure the height of your present mesh curtain - from top to bottom. Order the stock number based on the chart shown at the right.

Custom Mesh Panels

If our standard sized Replacement Mesh will not meet your sizing needs, custom cut mesh panels are the answer. Specify width and height and Thermo-Rite will hand make you a panel that meets your specific needs.

Mesh Replacement Panels

All Mesh Curtain Panels are 24" Wide

If our standard sized Replacement Mesh will not meet your sizing needs, custom cut mesh panels are the answer. Specify width and height and Thermo-Rite will hand make you a panel that meets your specific needs.

ACCESSORIES

Custom Riser Bars

Description	Price List
For Polished, Antique and Black Finishes up to 2" high x 54 5/8" wide	\$129.00
For heights over 2" add	\$16.00/inch
For widths over 54 5/8" up to 72" add \$22.00 plus	\$3.00/inch

Custom riser bars are available in solid brass. Riser bars may also be used as top caps; however, you must indicate accordingly when ordering as the mounting holes must be punched. Custom riser bars/top caps allow you to use stock enclosures when you are able to overlap the sides, but must fit under a projecting row of brick.

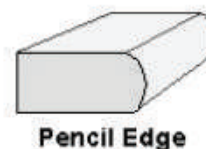

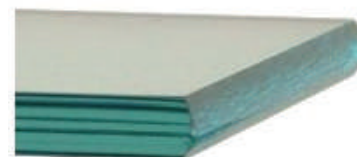

HOW TO ORDER

- Use custom order form #5 and completely fill out all information requested.
- Order must be mailed or faxed to Thermo-Rite.

Custom Tempered Glass

Description	Price List
To calculate price, add Width + Height to determine over all total dimension	
Up to 36" Total	\$59.00
Up to 42" Total	\$79.00
Up to 48" Total	\$99.00
Up to 54" Total	\$120.00

- 1/4" Tempered Glass
- Bronze, Grey or Clear
- Pencil edge on sides

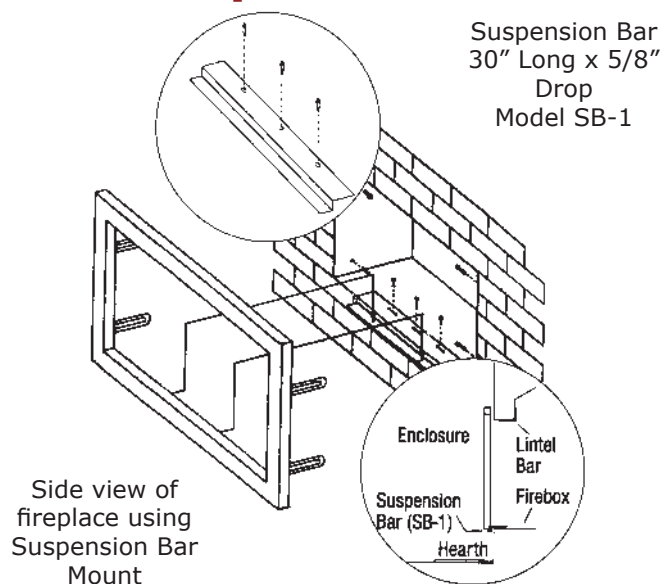

Whether used as replacement or for other purposes, tempered glass is durable and beautiful. Also makes great shelving, tabletop protection, and a durable material for arts and crafts. Whatever your need, Thermo-Rite has you covered.

HOW TO ORDER

- Use custom order form #8 and completely fill out all information requested.
- Call for custom quote for any sizes exceeding 54" total dimension
- Order must be mailed or faxed to Thermo-Rite.

Suspension Bar

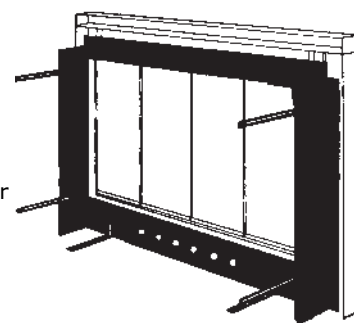

Install-Rite Door Kit

Install-Rite Door Kit

*For Stone & Rough - Faced
Fireplace Door Installations*

For stone and rough-faced fireplace door installations. Install-Rite allows you to mortar in a door with ease. It has the following characteristics:

- > Fits openings up to 44" w X 32" high. You can cut the exact size.
- > Extenders are available for larger sizes.
- > Fits Regal, Cameo, Décor & Reserve.
- > For inside and overlap fit.
- > Can ship by ground carrier.
- > Finished in black. Comes complete with hardware & instructions.

INSTALL-RITE

List Price \$149.00

Our Install-Rite door kit will help you to increase your standard door sales immediately. Install-Rite is for those with hard to fit stone and rough-faced fireplaces — custom doors are no longer their only alternative. You can now offer your customers genuine solid brass Thermo-Rite doors with two coats of baked on lacquer — Pricing on Thermo-Rite stock doors is always less than all custom doors. A 1/4" to 1/2" overlap is not a problem with Install-Rite.

Thermo-Rite Manufacturing Showroom Display Board

Enhance your Thermo-Rite Manufacturing Fireplace Enclosures showroom displays by adding a Display Board.

EACH DISPLAY BOARD OFFERS THE FOLLOWING FEATURES:

• Finished Corners

Showcases the Décor in Textured Bronze Iron, Heritage in Textured Natural Iron, Cameo in Pewter and Z Décor in Black.

• Door Handles

Six (6) handles are shown in Antique, Black, Stainless, Champagne Nickel, Pewter and Polished Brass Finishes.

• Glass Options

Bronze glass, clear glass and grey glass are high-lighted in the center of the board.

• Glass Channels

The glass listed above is shown in glass channels with Black, Brushed Silver, Polished Brass, Satin Brass, Antique Brass, Copper, Hammered Black & Hammered Brass Finishes.

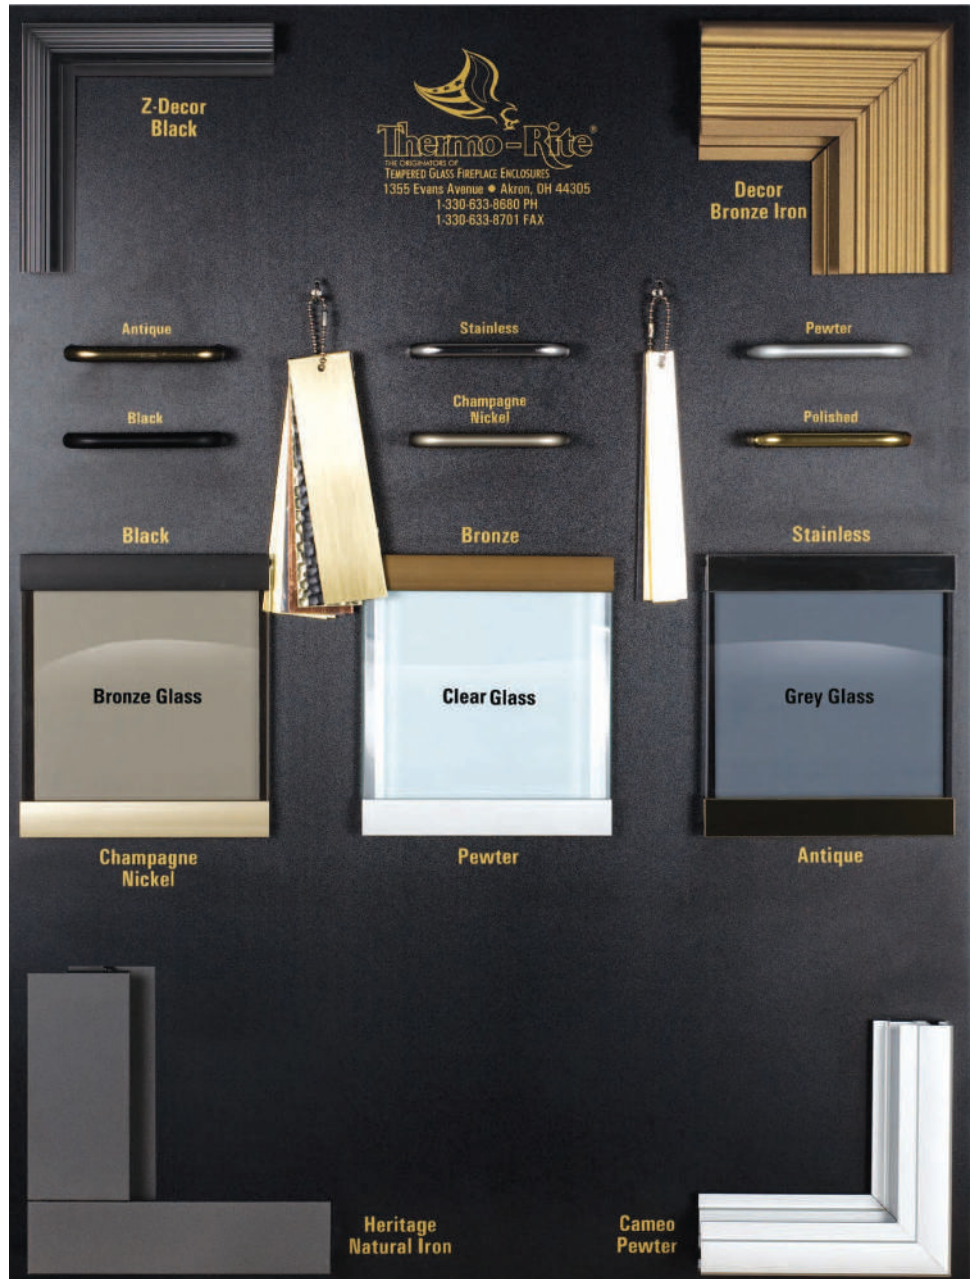

• Décor Inserts

Chained together are the insert finishes available for the Décor doors. These finishes are: Black, Brushed Silver, Polished Brass, Satin Brass, Antique Brass, Copper, Hammered Black and Hammered Brass

• Z-Décor Inserts

Also provided on a chain are the insert finishes available for Z-Décor inserts. They are: Brushed Silver, Polished Silver, Black and Satin Brass finishes.

Part #DB3 - Price \$99

These Display Boards are 23 1/2" wide and 31 1/8" high and, can be wall mounted or make a quality statement shown on an easel frame.

Please allow for ten (10) working days for delivery.

Types of Masonry & Warranty

THERMO-RITE LIMITED WARRANTY POLICY

Thermo-Rite warrants all new glass fireplace enclosures to be free from defects in material and workmanship for a period of five (5) years from the ultimate sale or installation if performed by the dealer. The warranty is void if the damage is due to improper installation or improper operation.

Thermo-Rite warrants tempered glass a lifetime to the original owner. Commercial applications and CV1 glass wider than 16 3/4" are excluded. If the glass should break, Thermo-Rite will supply panels free-of-charge except for the UPS® shipping charges.

Should the customer or dealer want Thermo-Rite to install the glass, a fee of \$15.00 plus freight both ways

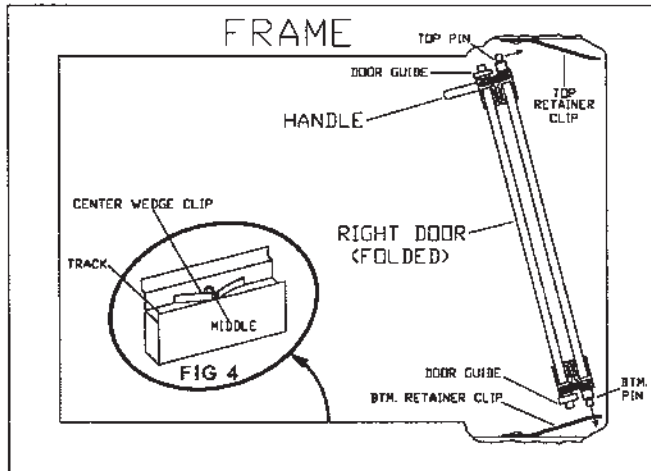

will be charged for each piece. In this case, a Return Goods Authorization (RGA) must be issued. To receive an RGA form, simply contact an inside sales correspondents by calling 330.633.8680.

To receive replacement glass, customer or dealer must supply Thermo-Rite with a copy of proof of purchase date to receive a no-charge invoice on the glass.

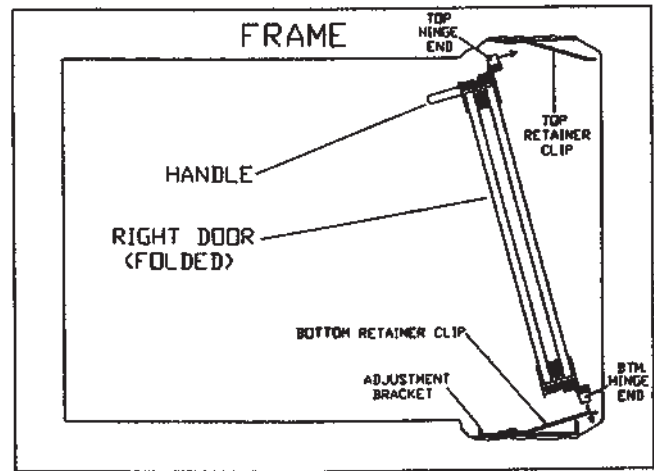

**Please Note:* To ensure accuracy of your order, kindly inspect the door(s) upon receipt. Thermo-Rite shall not be held responsible for any reason after a period of (90) days from date of receipt of order.

Measuring

Determine if your fireplace is a factory built prefabricated fireplace or a masonry type fireplace. If your fireplace is a factory built prefab, refer to “measuring a zero-clearance fireplace.”

Masonry Fireplaces

All types of fit: Be sure to take all measurements to the nearest 1/16” using a steel tape measure. Note any irregularities around the opening of the fireplace, such as projecting or recessed brick, and advise on the Custom Order Form accordingly. For complex custom applications, a photograph of the fireplace will prove very helpful.

Overlap Fit is when the enclosure is larger than the opening of the fireplace. Measure the width of the opening at the top and again at the bottom. We need the minimum and maximum widths. See Figure 1.

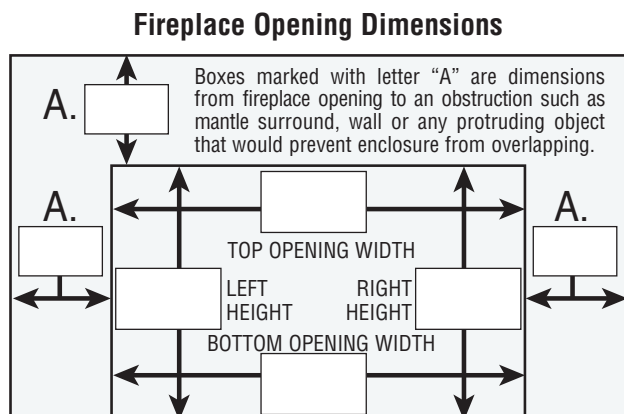

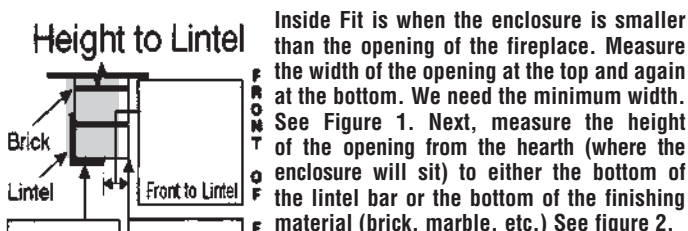

Figure 1

Next, measure the height of the opening from the hearth (where the enclosure will sit) to the brick, marble, slate, etc. When ordering Regal or Original, make sure you do not overlap the opening more than 3 1/4” when using mesh curtains. When ordering Cameo or Classic with mesh, indicate on the Custom Order Form the thickness of the lintel bar, as we must allow the mesh angle assembly to clear under the lintel bar. If there is no hearth extension or you have a raised firebox, you will need to overlap the bottom of the opening (Picture frame mount). To aid in this installation, use the suspension bar (SB-1). The suspension bar drops down 5/8”, therefore adding 5/8” to the effective opening.

Inside Fit is when the enclosure is smaller than the opening of the fireplace. Measure the width of the opening at the top and again at the bottom. We need the minimum width. See Figure 1. Next, measure the height of the opening from the hearth (where the enclosure will sit) to either the bottom of the lintel bar or the bottom of the finishing material (brick, marble, etc.) See Figure 2.

Notes on Inside Fit Enclosures:

Width - If the top width is 42” and the bottom width is 41 1/2”, we will make the enclosure 41 1/4” wide allowing 1/8” clearance tolerance on each side. This means that at the top, there will be a 3/8” gap between the side panel and the frame on each side. You may reduce this gap by ordering exact overall frame size,

but remember to allow enough clearance for the enclosure to fit into the smallest width dimension (Factory tolerance is + or - 1/32”). Another option may be to use the Laser enclosure. Generally, the clearance tolerance gaps can be filled from the backside of the frame using high temp silicon RTV. If the gaps become excessive (as in a stone fireplace), it may be necessary to mortar in the enclosure.

Height - If you are planning on installing the enclosure under the brick, the face of the lintel bar must be 1 1/8” back from the face of the fireplace, otherwise the enclosure will protrude out from the fireplace, as the enclosures are 1 1/8” thick. The distance from the face of the fireplace to the face of the lintel bar must be indicated in the area provided on the custom order forms before we can begin processing your order. See figure 2. In general, you will usually obtain a better fit (and easier installation) when you overlap fit the enclosure to the fireplace.

Stone Fireplaces: If the stone is smooth enough, you can overlap or inside fit as described above. Most of the time, however, the enclosure will need to be mortared in. On certain size applications, the Install-Rite will be a tremendous aid in this process. It is usually best to select a smaller size enclosure (than the opening) and mortar in from the sides rather than overlapping and trying to mortar behind the side panels. This also tends to give the appearance of a concrete box in front of the fireplace with an enclosure up against it rather than the “built in” look. The best person to select a size enclosure for a rough stone fireplace is the person that will be installing it. When you order an enclosure for a rough stone fireplace, we suggest that you do not try to provide us with opening dimensions; simply indicate “stone” on the type of fireplace on the order form and indicate what size outside frame dimensions you need.

Zero-Clearance Fireplaces

Determine the manufacturer and model number of the fireplace. This information is usually located high on the inside wall of the fireplace above the refractory panels or behind the mesh curtain on the inset return. Once this information is obtained, refer this price list and determine if a stock enclosure is available. If the fireplace manufacturer and model are not listed, refer to custom Z-Door™ pricing.

Custom Z-Door™: Measure the width and height of the steel opening where the enclosure will fit. See Figure 1. This will be the same position that the fireplace manufacturer’s enclosure would be installed. Do not measure the finish material in front of the fireplace; brick, stone, marble, slate, tile, etc. You may need to remove the track to install the Z-Door™, so measure accordingly. It is very important, however, not to modify or remove any other component of the fireplace. Determine if Air Studs or an Air Draft Bar should be used. The Air Stud will not add any thickness to the enclosure, and is used when there is an “ash lip” in the refractory or there is not enough inset depth. The Air Draft Bar is used more with “masonry appearance” type zero-clearance fireplaces. The Air Draft Bar will add 5/8” thickness to the enclosure, making the enclosure extend forward from the fireplace. Air Stud Example: If the inset is 1”, and the thickness of the enclosure is 1 1/8”, the enclosure will extend forward from the face of the fireplace 1/8”. See Figure 3.

We will manufacture the enclosure (less the cooling air intakes) based on the fireplace opening dimensions you provide.

Type of Fit: To process this order, one of these boxes must be checked: ☐ Overlap Fit _____ ☐ Inside Fit _____

- ☐ Check here if corner post interferes with inside fit enclosure or mesh. Provide details.

In the diagram below, boxes marked with letter "A" are dimensions from fireplace opening to an obstruction such as a mantle surround, wall or any protruding object that would prevent enclosure from overlapping.

COMMENT: _____

TYPES OF FIREPLACE:

- ☐ Brick
☐ Marble
☐ Stone

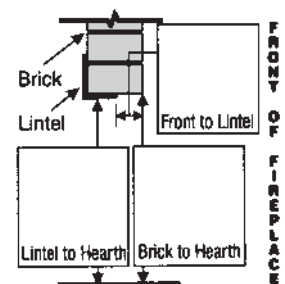

TYPE OF FIT

When you "Inside Fit" an enclosure, we will make the outside frame dimensions 1/8" smaller on each side (1/4" total), and 1/8" shorter on the height than the fireplace opening. It is important to measure both top and bottom widths and left and right heights. **Provide the following measurements for all Inside Fit enclosures and Overlap Fit enclosures (See "Height to Lintel" diagram below).**

MUST BE FILLED IN BELOW FOR INSIDE FITS

- ☐ CHECK IF THIS INFORMATION IS NOT APPLICABLE

FOR QUOTE ONLY

TYPE OF FIT

The **Z-Track**, **Z-Phantom**, **Z-Door**, **Z-Decor** and **Z-Classic** are inside fit only. The **Z-Track**, **Z-Phantom** and **Z-Decor** will be 1/8" smaller in width and height including Air Studs.

The **Z-Door** and **Z-Classic** are factory-built to allow 1/4" cooling air intakes between the outside of frame and inside of fireplace on all four sides.

The **Z-Laser** and **Z-Heritage** models will overlap the opening by 1/4"-3/4" on both sides, top and bottom. Factory may allow other clearances based on the exact specifications of your zero-clearance fireplace.

INSET DEPTH

This is the distance from the face of the zero-clearance fireplace to any existing obstruction inside the opening. The inset depth affects the amount that the enclosure will fit into the opening. For example, the Z-Door frame is 1-1/8" deep. If the inset depth is 1", the face of the enclosure will protrude 1/8" from the firebox.

WARNING: If the inset depth is less than 3/4," the enclosure may not fit properly nor fit at all!

CHECK IF APPLICABLE

- ☐ Marble, tile, brick or stone protrudes into opening.
☐ Hearth is flush with bottom of opening.
☐ Louvers (circular model)
☐ Triple Wall Pipe Model
☐ Through Frame mount required (Z-Door and Z-Classic only)
☐ Air Draft Bar required (Z-Door and Z-Classic only)
☐ Obstruction prevents overlap (Z-Laser and Z-Heritage only)
☐ Box tapers immediately

NOTES:

Bar & Mesh will only be made from the above fireplace opening dimensions & height to lintel chart. When you only fill out the fireplace-opening dimensions chart, we will assume that the lintel information is not applicable. Please circle the desired Bar & Mesh number desired. The mesh can be off as much as 3/4" off of the firebox floor.

☐ **MESH PANELS ONLY**

MESH CURTAIN PANEL WIDTH: []

MESH CURTAIN PANEL HEIGHT: []
(Includes 1/2" Hog Rings)

If our standard sized Replacement Mesh on page 49 will not meet your sizing needs, custom cut mesh panels are the answer. Specify width and height and Thermo-Rite will hand make you a panel that meets your specific needs.

Note: See Picture on page 48 of the product catalog

☐ **MESH CURTAIN ASSEMBLY**

(Up to 48"W x 38"H Opening)

The Mesh Curtain Assembly is all the working hardware necessary to install mesh curtains in your fireplace. Lintel bar clamp mounting requires no drilling for easy installation. Custom sizing means each curtain is cut to meet your exacting needs for a truly tailored finish.

Note: See Picture on page 48 of the product catalog

ORDERING INSTRUCTIONS:

When ordering a Direct-Vent Fireplace Accessory Mesh Door or a Complete Reface enclosure, you need to provide the outside dimensions of the outer frame of your fireplace unit. These dimensions need to be exact to ensure proper coverage of your Direct-Vent or Zero-Clearance Fireplace. Please Note: This frame needs to either sit on the hearth or be supported by a 1" exposed metal piece at the bottom of the fireplace box. In addition, you must have 1" of exposed metal around the perimeter for the magnets which attach the enclosure to the unit.

(FRAME SIZE ONLY)
